

Summer 2025 CSE 321 Quiz 01

Time: 30 Minutes

Set A

Name	ID	sec

Q1. Show the outputs of the given code:

[8]

```

int main()
{
    pid_t a,b;
    int x = 5;
    int y = 3;
    a = fork();
    if (a<0)
    {
        printf("error");
    }
    else if (a==0)
    {
        x = x + y;
        y = x - y;
    }
    else
    {
        x = x*2;
        y = y - x;
        wait();
        b = fork();
        if (b==0)
        {
            wait();
            x = x +3;
            y = y + x;
        }
        else if (b>0)
        {
            wait();
            x = x + 5;
            y = y + 13;
        }
    }
    printf("x: %d\n", x);
    printf("y: %d\n", y);
}

```

Q2. Given the two statement, write true or false:

[.5 x 2]

- Given a program, if two processes are created of the same program, these two processes will take the same amount of memory.
- wait() function waits for all the child processes to finish for a particular process and then starts executing.
